

# BRIDGE FUND – Fund for Student Interdisciplinarity Bridging Life Sciences and Materials Science

## What is BRIDGE FUND and who is it for?

BRIDGE FUND is a fund addressed to CEITEC PhD students (supervised by CEITEC supervisor) which aims to further promote interdisciplinary projects between Life Sciences and Material Science at CEITEC.

## What conditions do I have to meet?

The proposed project must be focused on interdisciplinary research conducted jointly by two different Research Groups (the Supervisor and the Project Partner) from two different Research Programmes, one in Life Sciences and one in Materials Science.

## What will I get?

Students whose projects will be accepted will get stipend 10 000 CZK per month and 50 000 CZK lump sum for consumables per year.

The stipend is assigned for time duration of one year (September 2018–August 2019). Then the student can apply in the next call (with the explanation why his/her project should be funded for one more year).

## What are the selection criteria?

- » Project must be focused on **an interdisciplinary research between two Research Programmes** (one in Life Sciences and one in Materials Science), student will spend time in both laboratories. In the project proposal, the student will explain why it is necessary to use both laboratories to conduct the research.
- » Scientific quality of the project

## How can I apply?

Prepare a project and send an application
